The AWT – A1CLUB Weekly Test started from February 2nd, 2022 has been widely attended by a large number of Amateur Radio stations for which thank you very much. Now that the AWT has been held for one year, we will report the results of the AWT 2022 here.

During the past one year from February 2nd 2022 to January 25th 2023, AWT has been attended by a total of 271 stations, of which 77 stations were from overseas

such as W, ON, S5, KH6, I, UA9, etc. By holding the AWT in advance to the CWT1300 – Cwops Weekly Test (every Wednesday from 13:00Z-14:00Z), we are pleased that many HAM radio stations from all over the world participated to AWT every week.

 And in addition to the cooperation of Cwops members, we appreciate N1MM+ and CTESTWIN for supporting AWT logging, the 3830scores.com for AWT log submission and the cqcqcq.org contest calendar for AWT publication.

 AWT will continue to be held every Wednesday from 12:00Z-13:00Z. Please refer to the A1CLUB AWT webpage for the details.
